# Introduction

**Dear Colleague,**

We are delighted to bring the 2009 edition of our Brainworx catalogue. This catalogue gives details and pricing for over 180 titles in the areas of Child & Adult Cognition, Language & Mental Health. We also provide an extensive range of tools for use in therapeutic interventions with these groups.

---

#### **Qualification Codes:**

Qualification codes are stated alongside each product in the brochure. These codes are in accordance with the manufacturers requirements for distribution. Eligibility to purchase restricted materials is determined on the basis of training, education and experience. Further details of these codes are available at the back of the catalogue.

---

#### **What should I do once I've selected my products?**

To place an order, make a price enquiry or order a catalogue please ring Customer Services +353 402 35125, e-mail us at [info@brainworx.ie](mailto:info@brainworx.ie), or contact us via our website [www.brainworx.ie](http://www.brainworx.ie).

---

#### **What if I don't see what I want in the brochure?**

Please contact Customer Services by phone or fill in our online enquiry form, as the catalogue only gives a sample of what can be provided.

---

#### **Am I qualified to buy these tests?**

When you place your first order you will be asked to register your details with us to determine which products you are eligible to buy. If you have queries regarding your suitability, please contact Customer Services. A qualification form can be downloaded from our website [www.brainworx.ie](http://www.brainworx.ie).

---

#### **What about extra record forms etc?**

Records forms, profile forms, manuals and other administration materials are available for all products. For pricing and availability, please check our website [www.brainworx.ie](http://www.brainworx.ie) or contact Customer Services.

**Please Note:** Prices quoted in this brochure are subject to change due to variations in foreign exchange rates.

## Brainfact...

**“The human brain is capable of storing more ideas than the number of atoms in the known universe we prove how capable it is.”**

Clinical Interpretation of the WMS III.

QUAL LEVEL A CODE 0471380806 PRICE EX VAT €39.00

# 08. Qualification Codes

08.

You can find these on each title.

Dear Customer,

As you are aware there are different qualifications needed to purchase and use psychometric tests. Each manufacturer has set their own codes as a standard requirement for the use of their tests. Please find below descriptions of these codes as set out by Pearson Assessment, MHS and PAR. If there are any ambiguities regarding a person's suitability to use a particular test this can be resolved with our assistance directly with the manufacturer.

## 1. Pearson Assessment

**CL1** tests require professional post graduate qualification and training in Clinical or Educational psychology. They are also available to Chartered Occupational Psychologists and individuals with a relevant PhD.

**CL2** tests may be purchased by individuals who are certified by a professional organisation recognised by Pearson Assessment or have a graduate and/or post graduate qualification relevant to their profession. This qualification code would encompass all psychologists other than mentioned for CL1, speech or occupational therapists, mental health professionals and health practitioners.

**CL2R** tests require a further JCQ approved or similar qualification, including Certificate of Competence in Educational Testing (CCET), in special educational needs.

**CL3** tests, in general, are those which do not require an individual to have advanced training in assessment and interpretation. Qualified teachers or FE practitioners with NVQ level 3 or above would be given this code.

Access is considered to professionals with certification of in-house training by a Chartered Clinical Psychologist within certain government services.

The table below shows which tests are available to you within your training code:

Your Code:	Available Product Codes:
CL1	All 'CL' Products
CL2	CL2, CL2R, CL3
CL2R	CL2R, CL3
CL3	CL3

## 2. MHS

**MHS B** B-level products require that the user has completed graduate-level courses in tests and measurement at a university or has received equivalent documented training.

**MHS C** C-level products require that users fulfill b-level qualifications, and have training and/or experience in the use of tests. C-level users must also have an advanced degree in an appropriate profession (e.g., psychology or psychiatry). Depending on state/provincial requirements, membership in a relevant professional association (CPA, APA) or a state/provincial license/certificate in psychology or psychiatry may be necessary.

## 3. PAR

**PAR A** **Qualification Level: A** No special qualifications are required, although the range of products eligible for purchase is limited.

**PAR B** **Qualification Level: B** A degree from an accredited 4-year college or university in psychology, counseling, speech-language pathology, or a closely related field PLUS satisfactory completion of coursework in test interpretation, psychometrics and measurement theory, educational statistics, or a closely related area; OR license or certification from an agency that requires appropriate training and experience in the ethical and competent use of psychological tests.

**PAR C** **Qualification Level: C** All qualifications for Level B PLUS an advanced professional degree that provides appropriate training in the administration and interpretation of psychological tests; OR license or certification from an agency that requires appropriate training and experience in the ethical and competent use of psychological tests.

**PAR S** **Qualification Level: S** A degree, certificate, or license to practice in a healthcare profession or occupation, including (but not limited to) the following: medicine, neurology, nursing, occupational therapy and other allied healthcare professions, physician's assistants, psychiatry, social work; plus appropriate training and experience in the ethical administration, scoring, and interpretation of clinical behavioral assessment instruments.
